UART -> USB Debug Port

UART debug messages avaiable via a
USB port and a 3 pin jumper for
TX, RX, and GND UART connections

Power Monitor and Supply

PMS has an INA219 current sensor
for each board/node in the
PCB. Each takes in the 5V from it's
parent board and supplies 5V to said
board's circuit (its peripherals)
thus enabling monitoring

Dual FPC STM32<->Tang Nano 20K FPGA connection configuration. The STM32 side has two connectors where only one can be active at a time

- Configuration 1: FPGA_FFC with SPI, QSPI, UART connections.
- Configuration 2: FPGA_FMC with 16 bit muxed FMC configuration resulting in a 128kb shared address space between the STM32 & FPGA
